SUBJECT INDEX, VOLUME 78

Acetate-1-^{14}C, steroids formed from, in transplanted ovarian tissue, 261
ACTH, actinomycin D effects on action of, 929
and adrenal protein synthesis, 125
antibodies, 1067
effect of, on cardiac glycogen, 399
on phosphorylase activity in adrenal cortex, 220
influence on vitamin A, 945
secretion from heterotopic pituitaries, 533
sources of error in bio-assay of, 644
and stress, adrenocortical response to, in salmon and trout, 791
Actinomycin D, effects on ACTH-induced corticosteroidogenesis, 929
and estrogen-treated uteri, 286
Adenohypophysis, electrophoresis and prolactin activity of, 440
ADH, protein binding and diffusibility of, 779
Adipose tissue, rat, cleavage of bovine insulin by, 169
Adrenal cortex, bovine, pregnenolone synthesis stimulation from, 165
effect of ACTH on phosphorylase activity in, 220
Adrenal function and testis, 1061
Adrenal gland, rat, effect of sulfated mucopolysaccharide on zona glomerulosa of, 651
Adrenal medullary function in chronic "executive" monkeys, 685
Adrenalectomy, effect of, on hypercalciuric response to acute parathyroidectomy, 880
on pancreatectomized rats bearing MtT, 826
Adrenocorticotropic hormone, association of activity of, with granules from rat pituitary glands, 406
Adrenocorticotropin effect on triglyceride concentration, 1087
Age, influence of, on liver glycogenesis, 556
on pituitary LH content in sterile rats, 1053
Aggressiveness, endocrine factors in isolation-induced, 679
Aldosterone, and cardiac function, 211
sodium appetite induced by, 1120
Altitude, high, and iodine metabolism, 307
Amino acid(s), hyper- and hypocalcemic effects of, in parathyroidectomized rats, 1082
incorporation of, early effect of corticosterone on, 481
p-Aminohippurate, sex difference in transport of, by rat kidney, 403
α-Aminoisobutyric acid, modification of body levels of, by androgenic steroids, 137
Ampulla, rabbit, egg transport through, 568
Androgen(s), in isoimmune aspermatogenesis, 737
rat fetal testicular, 245
treatment with, prepubertal, influence on pituitary LH content in sterile rats, 1053
Anions, properties of, in thyroidal iodide transport, 581
Anti-androgen, nonsteroidal, 549
Antigoitrogenic properties of some 3′-alkyl-iodothyronines, 29
Anti-insulin action of cortisol on glucose metabolism, 1154
L-Arabinose, growth hormone and, 819
Aspermatogenesis, isoimmune, androgens in, 737
Assay for oxytocin, sensitive, 1

BALB/c/Ki mice, persistent vaginal cornification in goldthioglucose-treated, 845
Bio-assay, of ACTH, sources of error in, 644
for TSH, improved, 429
Blastocyst nidation, effect of clomiphene on, 82
Blood sugar and pituitary growth hormone, 759
Bone metabolism, inhibitory effect of thyrocalcitonin on, 1139
Brain, maturation of, effect of estradiol on, 1130
stimulation of, pseudopregnancy from, 141
Bull, estradiol metabolism in, 914

^{14}C, study of gluconeogenesis with, 765
Calcium, level of plasma, effects of parathyroidectomy and cautery of thyroid gland on, 1144
metabolism of, in thyroidectomized rats, 240
mobilizing activity of, in dog kidney, 884
release of, inhibitory effect of thyrocalcitonin on, 1139
Carbohydrate metabolism in rat uterus, estrogen control of, 1205
Cardiac function and aldosterone, 211
CBG and pituitary gland, 277
Cells, granulosa and thecal, cholesterol formation by, 214
parafollicular, and monoamines, 1109
Cervical stimulation, depletion of pituitary prolactin after, 216
Cholesterol formation by granulosa and thecal cells, 214
Clomiphene and blastocyst nidation, 82
Collagen metabolism in dermis of hypophysectomized rats, 1255
Corpora lutea, new, in mature hypophysectomized rats, 1259
of pseudopregnant rabbits, luteolytic effect of LH and HCG on, 67
Corpus luteum, bovine, pregnenolone synthesis stimulation from, 165
Corticosteroidogenesis, ACTH-induced, effects of actinomycin D on, 929
Corticosteroids, 11β-hydroxy and 11-keto, growth of fibroblasts under influence of, 373
Corticosterone, early effect of, on amino acid incorporation, 481
Corticotrophs in rat pituitaries, 745
Cortisol, anti-insulin action of, 1154
excretion of, growth hormone and, 971

physiological activity of protein-bound and unbound, 1159
and thymidine-2-^{14}C incorporation, 600
Cyonin treatment, effects on pituitary LH in immature female rats, 1268
Cysteine, effect of, on iodine metabolism, 805
Cytochrome *c* concentration, effect of thyroidectomy on, 642

Decarboxylase, aromatic amino acid, effect of gonadal hormones on, 1135
Dehydrogenase(s), hydroxysteroid, biochemical properties of rabbit ovarian, 672
in mammalian reproductive tissues, 667
Deiodination, T_4, heat-resistant, 855
pitfalls in studies of, 7
Density gradients and mitochondria, 733
Deoxycorticosterone acetate and renal artery constriction, 316
Diabetes, permanent, induction of, by MtT tumor, 826
Diet, protein-free, hormonal treatment of lactating rats on, 575
Diiodotyrosine in desiccated thyroid, 231
L-DIT, effect of GH and TSH on, 471
Dwarfism, thyroid and pituitary glands in sex-linked, 950

Egg(s), effects of ethinyl estradiol on transport and development of, 860
transport of, through ampulla of rat oviduct, 568
Electrolytes in parathyroid dysfunction, 16
Electrophoresis, disc, study of proteins of posterior pituitary using, 659
zone, of rat adenohypophysis, 440
Endocrine factors, in isolation-induced aggressiveness, 679
Enucleation, luteal, pituitary gonadotrophic activities following, 897
Enzyme, mast cell hydrolysis of thyroglobulin by, 350
Epinephrine, effects of, comparison of glucagon and, 47
infused, insulin secretion inhibited by, 87
Erythropoiesis, estrogen action in, 325
Esterases, plasma, sex-associated differences in inbred mice, 655
Estradiol, effect of, on brain maturation, 1130
on enzymes of carbohydrate metabolism in uterus, 409
ethinyl, effects on egg transport and development, 860
and glycogen synthetase, 786
^{3}H-, in hypothalamus, 487
17β-Estradiol-4-^{14}C, biliary metabolites of, in the bull, 914
Estrogen(s), action of, in erythropoiesis, 325
control of carbohydrate metabolism in uterus by, 1205
counteraction of norethindrone blockade by, 151
inhibitory effects of, on fructose secretion, 1084
progestin influence on ovarian responses to, 297
Estrous cycle, hamster, pituitary LH content during, 34
LH in blood plasma during, 976
Estrus, "constant," pituitary LH during, 1007

Fat cells, antilipolytic effect of insulin in, 773
Fatty acids, role in iodide-complexing lecithin, 453
Fibroblasts, effects of steroids on growth of, 373
Fluid exchange in male and female rabbits, 291
Fluorescence in characterization of bovine growth hormone, 98
Food, influence on vitamin A of restriction of, 945
Fructose secretion, inhibitory effects of estrogens on, 1084
FSH, and LH, in pregnant and lactating pigs, 801
pituitary, depletion of, by beef and pig hypothalamic extracts, 1105
effects of hypothalamic extract and androgen on, 500
secretion of, in rodents, 1230

GH, and arabinose uptake, 819
bovine, fluorescence in characterization of, 98
and cortisol excretion, 971
effect of, on L-DIT, 471
equine, 561
hypothalamic regulation of secretion of, 605
pituitary, blood sugar and, 759
and transamidinase, 1238
Glucagon, effects of, comparison of epinephrine and, 47
on gluconeogenesis, 538
insulin effect on lipolytic action of, 773
secretion of, neutral red and, 195
Gluconeogenesis, from ^{14}C- and ^{3}H-labeled substrates, 765
glucagon effect on, 538
Glucose, effects of GH on entry into adipose cells, 819
influence of alterations in amount available on GH secretion, 759
metabolism of, anti-insulin action of cortisol on, 1154
neutral red and, 195
uterine, pathways of, 1205
Glycogen, cardiac, effect of ACTH on, 399
synthetase of, estradiol and, 786
Glycogenesis, liver, influence of age on, 556
Glycoprotein metabolism in dermis of hypophysectomized rats, 1255
Goiter, congenital, in cattle, 1213
Goitrogen effect on TSH and FSH secretion in rodents, 1230
Goldthioglucose, persistent vaginal cornification in mice treated with, 845
Gonadectomy effect on TSH and FSH secretion in rodents, 1230
Gonadotrophic hormone, histochemical localization

of rat ovarian 20α-hydroxysteroid dehydrogenase activity initiated by, 75
Gonadotropin(s), chorionic, in pregnant rhesus monkey, 204
inhibitor of, in monkey urine, 923
progestin influence on ovarian responses to, 297

^{3}H, study of gluconeogenesis with, 765
HCG, luteolytic effect of, 67
synergistic effects of HPL and, 707
Heart, iodine-containing compounds in rat, 61
Homograft, pancreatic, insulin from, 873
Hormone(s), antagonists of, and uterotrophic steroids, 111
gonadal, effect on aromatic amino acid decarboxylase in uterus, 1135
lactating rats on protein-free diet and, 575
luteinizing, comparative studies of, 186
neurohypophysial, of amphibian and reptile, 591
parathyroid, and thyrocalcitonin, 1144
pituitary ovulating, neural control of release of, in golden hamster, 1125
response of melanocytes to, 367
various, effect on mammary gland growth, 396
HPL, synergistic effects of HGH and, 707
Hydrogen peroxide, thyroxine deiodination by, 1248
Hydroxylase, 11β-, prolonged inhibition of, 511
18-Hydroxylation, steroid, effect of Su-4885 on, 343
Hydroxysteroid dehydrogenase(s), activity in mammalian reproductive tissue, 667
rabbit ovarian, 672
20α-, activity, histochemical localization of, 75
Hypercalciuria of parathyroidectomy, 880
Hyperemia assay, measurement of LH by, 815
Hyperparathyroidism, experimental, 1015
electrolytes in, 16
Hypoglycemia, insulin, action on adrenal cortical secretion, 1264
Hypoparathyroidism, experimental, electrolytes in, 16
Hypophysectomized rats, effects of increasing numbers of pituitary transplants in, 1023
Hypothalamic extract(s), depletion of pituitary FSH by, 1105
influence on TSH, 1002
Hypothalamus, bovine, purification of TRF from, 726
^{3}H-estradiol in, 487
FSH-releasing action of, 500
sheep, LH activity in, 901
Hypoxia and iodine metabolism, 307

^{131}I, determination of thyroidal, improved technique for, 254
thyroidal clearance of, inhibitory effect of liver slices and extracts on, 633
ICSH and testicular steroidogenesis, 690
Implants, cultured thyroid cell, in rats, 1177
Insulin, "bound," biologic effects after intravenous administration, 1079
bovine, cleavage of, by rat adiopose tissue, 169
crystalline, heterogeneity of, 1115
in fat cells, antilipolytic effect of, 773
hypoglycemia induced by, effect on adrenal cortical secretion, 1264
and iodine metabolism, 339
from pancreas, tentative identification of, 873
resistance of, in late gestation, 707
secretion of, epinephrine inhibition of, 87
Iodide, circulating, thyroid organification of, enhanced by thyrotropin, 621
free iodotyrosines as source of, 401
inhibition of thyroid biosynthesis by, 1171
transport of thyroidal, 581
Iodine, compounds of, intracellular, 61
metabolism of, cysteine effect on, 805
effect of hypoxia and high altitude on, 307
and insulin, 339
in rats on low-iodine diet, 889
Iodoamino acid synthesis in thyroid gland, effect of graded doses of propylthiouracil on, 1165
Iodothyronine(s), synthesis of, in thyroid lobes, stimulation of, 715
3′-alkyl-, antigoitrogenic properties of, 29
Iodotyrosines, free, as source of iodide, 401

Kidney, dog, parathyroid hormone-like substance in, 884
rat, iodine-containing compounds in, 61
sex difference in transport of *p*-aminohippurate by, 403

Lactation, improvement of, by hormonal treatment of rats on protein-free diet, 575
initiation of, by hypothalamic implantation of perphenazine, 919
in pituitary-autografted rats, 837
Lecithin, iodide-complexing, fatty acid role in, 453
Lesions, hypothalamic, induction of LtH secretion in male by, 158
LH, activity of, in extracts of sheep hypothalamus, 901
in blood plasma during estrous cycle, 976
and bovine corpus luteum metabolism, 937
estrogen effect on release of, 487
and FSH in pregnant and lactating pigs, 801
luteolytic effect of, 67
median eminence implants of, 893
and pituitary LH, 41
pituitary, concentration of, during "constant estrus," 1007
during hamster cycle, 34
effects of cyonin treatment on, 1268
in sterile rats, 1053
secretion of, "short" feedback control of, 55
treatment with, effect on pregnant rabbits, 887
LHRF changes during puberty, 958
Liver, iodine-containing compounds in rat, 61
slices of, and extracts, thyroidal ^{131}I clearance inhibited by, 633

Luteal regression, LH-induced, fetal-placental inhibition of, 887
Luteinizing hormone(s), activity of, ovarian cholesterol depletion test for, 218
comparative studies of, 186
measurement by hyperemia and OAAD assays, 815
Lysine vasopressin, immunochemical studies with, 809

Mammary gland, effect of hormones on growth of, 396
Mammary secretion, induction in male rats of, by hypothalamic lesions, 158
Mast cells, localization of rat thyroid alkaline protease to, 361
Melanocytes, response to hormones, 367
Mepyrapone inhibition of 11β-hydroxylation, 511
Metabolism, bone, vitamin D and, 1100
carbohydrate, effect of estradiol on enzymes of, in rat uterus, 409
cellular, molecular interactions in control of, 412
corpus luteum, influence of LH on, 937
Metabolites, progesterone, isolation and identification of, in rat testes, 460
Mice, inbred, sex-associated differences in plasma esterases of, 655
Microsomes, calf thyroid, two heme proteins in, 661
Mitochondria, and density gradients, 733
thyroxine and, 505
Monkey(s), chronic "executive," thyroid and adrenal medullary function in, 685
gonadotropin inhibitor in urine of, 923
Monoamines and parafollicular cells, 1109
Monoiodotyrosine in desiccated thyroid, 231
MSH, pituitary, after suckling, 522
MtT tumor, pancreatectomy results in rats bearing, 826
Mucin formation, sialic acids as indicator of, 1093
Mucopolysaccharide, sulfated, effect on zona glomerulosa of rat adrenal gland, 651
Myopathy, experimental, induced by thyroxine, 648

Neurohypophysial hormones, of amphibian and reptile, 591
Neutral red and glucose metabolism, 195
Nidation, blastocyst, in rat, effect of clomiphene on, 82
Norepinephrine depletors, brain, ovulatory failure after treatment with, 225
Norethindrone blockade, counteraction of, by estrogen, 151
Norethynodrel and pituitary proteins, 1037

OAAD assay, measurement of LH by, 815
Obesity, ovarian function in goldthioglucose, 845
Organification, thyroid, TSH enhancement of, 621
Organogenesis, development of vagina in male rats during, 628
Ovariectomy, normal pregnancy after, 1076
Ovary, transplanted rat, steroids of, 261
Ovulation, from brain stimulation, 141
in hamsters, 1125
Oxidation, isocitrate, PTE effect on, 614
Oxidoreductases, placental hydroxysteroid, 333
Oxytocic activity, sensitive assay for, 1

Pancreatectomy, results of, in rats bearing MtT, 826
Parathyroid, dysfunction of, electrolytes in, 16
extract of, *in vitro* effect on isocitrate oxidation, 614
transplants of, experimental hyperparathyroidism from, 1015
Parathyroidectomy, effect on plasma calcium level of rats with autotransplanted parathyroid glands, 1144
hypercalciuria of, 880
Perphenazine, lactation initiation by hypothalamic implantation of, 919
Phosphorylase activity in pseudopregnant rat uterus, 383
Pigs, FSH and LH in pregnant and lactating, 801
Pituitary(-ies), autograft, lactation in rats with, 837
of dwarf chicken, 950
multiple heterotopic, ACTH secretion from, 533
secretion of, effect of steroids on, 445
Pituitary gland(s), association of adrenocorticotropic hormone with small secretory granules from, 406
and CBG, 277
equine, GH from, 561
rat, corticotrophs in, 745
thyrotropin release by, 699
Placenta, hydroxysteroid oxidoreductases in, 333
Pregnancy, early, rhesus monkey chorionic gonadotropin in, 204
normal, after ovariectomy, 1076
Pregnenolone synthesis stimulation, 165
Progesterone, metabolism of, in rat testis, 1041
metabolites of, in rat testes, 460
-4-^{14}C metabolism to androgens in isoimmune aspermatogenesis, 737
7-^{3}H-, conversion to androgens of, by rat fetal testis, 245
Progestin(s), and ovarian reactivity, 297
prenatal, virilization by, 965
Prolactin, effect of, on corpora lutea, 1259
pituitary, inhibition of depletion of, 216
Prolactin activity of rat adenohypophysis, 440
Propylthiouracil, effect of, on labeled iodothyronine synthesis, 715
on rat pituitary glands, 699
graded doses of, effect on iodoamino acid synthesis in thyroid gland, 1165
Protease, rat thyroid alkaline, 361
Protein(s), adrenal, early effects of ACTH on synthesis of, 125

binding and diffusibility of ADH by, 779
heme, in calf thyroid microsomes, 661
pituitary, norethynodrel and, 1037
possibly insulin, produced by hamster pancreatic homografts, 873
of posterior pituitary, disc electrophoresis of, 659
of skeletal muscle, thyroxine stimulation of amino acid incorporation into, 1252
Provera effect on FSH secretion, 445
Pseudopregnancy, from brain stimulation, 141
uterine phosphorylase in, 383
Puberty, hypothalamic LHRF changes at, 958

Renal artery constriction and deoxycorticosterone acetate, 316
Reproductive tissues, mammalian, hydroxysteroid dehydrogenase activity in, 667
RO1-8307 effect on zona glomerulosa of rat adrenal gland, 651
Ro 5-2537, further studies on, 549

Salmon, adrenal response in trout and, 791
Serotonin formation in uterus, 1135
Sex differences in fluid exchange during food deprivation, 291
Shock, electric, influence on vitamin A, 945
Sialic acids in mouse vagina, 1093
Silicone rubber, passage of steroids through, 208
Sodium appetite, aldosterone-induced, 1120
Steer, testosterone metabolism in, 907
Steroidogenesis, testicular, ICSH and, 690
Steroids, androgenic, and AIB distribution in rats, 137
effect on pituitary secretion, 445
passage through silicone rubber of, 208
of transplanted rat ovary, 261
uterotrophic, and hormone antagonists, 111
Stress, and ACTH, adrenocortical response to, in salmon and trout, 791
Suckling, pituitary MSH after, 522
Su-4885 effect on 18-hydroxylation, 343

T_4* in intraocular pituitary transplants, 302
Testis, and adrenal function, 1061
rat, progesterone metabolism in, 1041
Testosterone, fighting behavior induced by, in hypophysectomized and orchidectomized mice, 679
-4-^{14}C, fecal metabolites of, in the steer, 907
in rat testicular homogenates, 460
Thiocyanate, oxidation of, 1198
Thiouracil effects on thyromimetic action, 1189
Thymidine-2-^{14}C incorporation and cortisol, 600
Thyrocalcitonin, inhibitory effect on calcium release and bone metabolism, 1139
and parathyroid hormone, 1144
Thyroglobulin, abnormal, in congenital goiter of cattle, 1213
hydrolysis of, by mast cell enzyme, 350
Thyroid(s), biosynthesis of, iodide inhibition of, 1171
desiccated, T_4, T_3, MIT and DIT in, 231
effect of thyrotropin injection on pyridine nucleotide content of, 1049
function of, in chronic "executive" monkeys, 685
oxidation of thiocyanate as index of, 1198
pituitary tumor MtTW5 suppression of, 267
without vasopressin, 1224
implants of, homeostatic effect of simultaneous, 1015
oxidative enzymes of, response to TSH of, 1032
puromycin-blocked, TSH action on, 103
status of, effect of alterations in, 527
Thyroid cell implants, cultured, in rats, 1177
Thyroid gland(s), effect of graded doses of propylthiouracil on iodoamino acid synthesis in, 1165
monoaminergic mechanisms in parafollicular cells of, 1109
of rats on chronic low-iodine diet, 889
thyrotropin-stimulated, free iodotyrosines as source of iodide released from, 401
Thyroid lobes, *in vitro* iodothyronine synthesis in, 715
Thyroidal ^{131}I determination, improved technique for, 254
Thyroidectomized rats, calcium metabolism in, 240
Thyroidectomy effect on cytochrome *c* concentration, 642
Thyrotropin, injection of, effect on pyridine nucleotides, 1049
release of, by rat pituitary gland, 699
Thyroxine, analogs of, thiouracil effects on α-glycerophosphate dehydrogenase response to, 1189
deiodinating system of, heat-resistant, 855
deiodination of, by hydrogen peroxide, 1248
in desiccated thyroid, 231
experimental myopathy induced by, 648
formation of, extrathyroidal, 983
metabolic and maturational effects of, 527
and mitochondria, 505
monodeiodination of, by anterior pituitary gland, hypothalamic influence on, 302
pitfalls in deiodination studies of, 7
release of, from puromycin-blocked thyroids, TSH-induced, 103
stimulation of amino acid incorporation into protein of skeletal muscle by, 1252
Transamidinase and GH, 1238
Transplants, pituitary, multiple ectopic, 1023
TRF, bovine, purification of, 726
and TSH secretion, 389
Triglyceride concentration, effect of adrenocorticotropin on, 1087
Triiodothyronine in desiccated thyroid, 231
Trout, adrenal response in salmon and, 791
TSH, effect of, on L-DIT, 471
on pyridine nucleotides, 1049
enhancement of organification by, 621
improved bio-assay for, 429
influence of hypothalamic extract on, 1002
secretion of, in rodents, 1230
and TRF, 389

thyroid oxidative enzyme response to, 1032
Tumor MtTW5 effect on pituitary-thyroid axis, 267

Upjohn Lecture, 412
Urine, monkey, gonadotropin inhibition in, 923
Uterus(-i), estrogen-treated, and actinomycin D, 286
serotonin formation in, 1135

Vagina, development in male rats, 628
mouse, sialic acids in, 1093
Vasopressin, lysine, immunochemical studies with, 809
thyroid function in absence of, 1224
Virilization by prenatal progestin, 965
Vitamin A, influence of ACTH, food and shock on, 945
Vitamin D and bone metabolism, 1100
